

Measure these lines after printing. They should equal 4 inches to get the correct measurement for your glove size. If lines do not equal 4 inches, check that the print scaling option of the printer box is set to Fit to Printable Area.

GRIP2RIP Sizing Chart

1- Place a pen or pencil here. Using the eraser end of an unsharpend pencil works best.

2- Slide your hand firmly against the pencil or pen, making sure the pencil or pen does not move.

3- Press your hand down on the sizing chart to flatten the palm against the surface of the chart.

4- Your glove size is indicated by the line at or above the middle finger.
